

Our environmental policy

Our values

We consider sustainable development as one of our most important obligations. We are committed:

to developing products that contribute to sustainable development

to reducing the environmental impact of the production processes.

Conscious of the important challenge facing our society, we promote the use of glass products that help to reduce energy use and greenhouse gas emissions.

Our commitment

Involvement of management and all employees

A long-term process of continuous improvement to enhance environmental protection.

Our principles

In carrying out its policy, AGC Glass Europe will comply with the following principles:

Compliance with all environmental legislation and voluntary agreements signed in all countries where the group operates.

Monitoring the environmental burden of all the group's activities.

Defining **guidelines and action plans** in order to reduce the environmental impact of the manufacturing activities, in an ongoing process of continuous improvement and pollution prevention.

Developing products with a positive impact on the environment during their lifetime, designed to facilitate end-of-life recycling.

Rational use of energy and reduction of greenhouse gas emissions.

Conserving natural resources by promoting the recycling of materials for the production of glass, and reducing waste production and water consumption.

Making **environmental responsibility part of the day-to-day activities** of the group at all levels of management and operation, including customers and suppliers.

Communicating with all stakeholders concerning the evolution of the group's environmental impact.
